

Carthage Swine Conference

Ventilation Preconference Workshop

Join us for hands on ventilation training workshop on Monday, August, 31, 2020, the day prior to our Annual Carthage Swine Conference. This training is a combination of classroom instruction, as well as in barn training at the Carthage Learning and Development Center. This facility has multiple types of ventilation controllers, inlets, and fan types as well as a room with filtration.

Wean to market and breed to wean ventilation

The workshop will explore ventilation design, components, and principles (controllers, inlets, fans, and cooling, emergency systems) and their interaction with pigs. Time will be spent in the barn applying principles taught in gestation, farrowing, and wean to market barns. The workshop will explore new technologies and application – advanced controllers and positive pressure ventilation design. We will also work through cases and trouble shoot everyday problems. We have the capability to smoke a room to visualize air patterns from observation windows. You will leave this session understanding the principles of ventilation and ability to apply them immediately in your barns.

The session will run from **9 a.m. to 3 p.m.** at the **Carthage Learning and Development Center (309 N 2nd Street, Carthage, IL 62321)**. The **cost for each participant is \$100**. Snacks and a noon lunch will be served.

Registration for these seminars is located in the online registration area for conference attendees.

The 30th Annual Carthage Swine Conference will be hosted at Western Illinois University on Tuesday, September 1, 2020. Be sure to register at <https://conference.hogvet.com/Registration/GenAttendee/Index>.
