Getting to work...

What is known

What is needed

What is the reality

Methods

Defined Roles and Responsibilities

- Preparation
- Sow Identification, Flagging for Follow-up

Defined Intervention Time Frames

- 9'clock walk
- At Risk Sows
 - Treatment
 - Walking
 - Charting

Getting to work...

What is known

What is needed

What is the reality

Methods

9-O'Clock Walk

- Completed with primary hustle of the morning.
- Leadership w/ Defined Caregiver
 - Daily
 - 20 minutes/day- 125 hours/year Pretty darn good ROI
 - \$73,600
- Teachable Moments and Observations
 - Did Team identify them all?
 - Repeatability, Responsiveness, Quicker Interventions
 - Greater the Result

At Risk sows

- Highly Visible Identification
- Looking for exceptions to normal behavior
- Acting on these observations

Getting to work...

CAUTION

Sow Care Card

Belly Layer with **MILK** or **NON-MILKER**?

** Circle MILK or NON-MILKER for reference*

	Day			Day			Day		
	F	W	P/P	F	W	P/P	F	W	P/P
Walked									
Temp									
Treatment									
Comments									

* Administer up to 3 doses, 1 each day of Oxytocin for treatment of poor milk production.

* If Oxytocin is administered, scan QR Code → to enter treatment into mobile device.

Oxytocin

PC-14-SOW CARE CARD - YELLOW

Conclusions..

- Teach the Team to “Listen with their Eyes”
- Defined Roles
- Defined Intervals
- Defined Follow-up
- Individual Sow’s Turn into Dozen’s of Pigs
